Professional Profile A results-driven Senior Frontend Developer with over six years of experience delivering robust, high-quality web applications for enterprise clients. Proven ability to translate complex business requirements into intuitive and responsive user interfaces using React and modern JavaScript frameworks. Adept at working in fast-paced, Agile environments and collaborating with cross-functional teams to achieve project goals.

Work Experience

Senior Software Engineer (Frontend), *PwC Pakistan*, Lahore, PK *(July 2021 - Present)*

- Lead frontend developer on a custom financial dashboard for a major banking client, built with **React.js** and **TypeScript**. The application handles real-time data visualization and complex user interactions.
- Engineered a modular component architecture that allowed for rapid feature development and customization across different client deployments.
- Integrated with multiple secure backend APIs, ensuring compliance with strict financial data handling protocols.
- Mentored two junior developers, providing technical guidance and enforcing code quality standards through rigorous code reviews.

Software Engineer, *Techlogix*, Lahore, PK *(May 2019 - June 2021)*

- Developed and maintained user-facing features for a large-scale insurance management portal using **React** and **Redux**.
- Collaborated with UX/UI designers to implement pixel-perfect designs, ensuring a consistent and professional user experience.
- Wrote unit tests for key components using **Jest**, which helped reduce production bugs by 20%.
- Participated in the complete software development lifecycle, from requirements gathering to deployment and maintenance.

Associate Software Engineer, *Netsol Technologies*, Lahore, PK *(June 2018 - April 2019)*

- Assisted in the development of web-based solutions for the asset finance and leasing industry.
- Gained foundational experience with JavaScript, HTML, CSS, and version control with Git.

Technical Skills

- **Core Technologies:** JavaScript (ES6+), TypeScript, React, HTML5, CSS3
- **State Management:** Redux, Context API

- **UI Libraries:** Material-UI, Ant Design, Bootstrap
- **Testing:** Jest, Enzyme
- **Development Tools:** Git, Webpack, Babel, JIRA, Agile/Scrum Methodologies

Education

Bachelor of Engineering in Software Engineering *National University of Sciences and Technology (NUST)*, Islamabad, PK *(2014 - 2018)*
